

Autism Spectrum Diagnostic Evaluations

CLINICAL & WELLNESS CENTER

Cognitive Behavioral Consultants
Manhattan / Westchester

NEW CBC SERVICE

Cognitive and Behavioral Consultants is now offering Autism Spectrum Diagnostic Evaluations for individuals age two through adulthood. Individuals with Autism Spectrum Disorder (ASD) exhibit deficits in communication skills and social relationships, while also engaging in restrictive, repetitive thoughts and behaviors.

Children and adults who meet the criteria for ASD can vary greatly in terms of their overall presentations; thus, the goals of our evaluations are two-fold. Through comprehensive interviews combined with measures of cognition, language pragmatics, behavior, and social-emotional functioning, including the Autism Diagnostic Observational Schedule (ADOS-2), we are able to obtain an in-depth assessment of an individual's specific strengths and challenges. We are then able to use this information to not only determine if an individual meets the criteria for ASD, but also to develop a comprehensive treatment and educational plan.

We support individuals and their families as they implement recommendations within their communities.

Additionally, CBC offers individual and group sessions supporting the development of executive functions, including: planning, scheduling, organizing, getting started, and persisting in the face of a challenge.

For more information about our assessment services, please contact Dr. Michelle Greenberg, Director of Clinical Intake Services, at (914)-385-1150, Option 1.
